

## Using our MTQG Slide Shows

Did you know there is a controller on the slide shows? If you haven't found this feature, the information on how to access and use it is given beneath the screenshot below.

First, place your mouse cursor in the middle of the slide show to get the controller to show up.

**A:** Use this icon to stop the show completely on any photo you wish to study. Move your cursor out of the way to make the controller disappear so you can see the photo. When you are finished looking at the photo, put your cursor back on the slide show and click the center icon to restart the slide show.

**(Note: the double line will now have become an arrow which means the slide show is ready to be restarted.)**

**B:** Lets you go **backward** one slide at a time

**C:** Lets you go **forward** one slide at a time

**D:** Takes you to the **first** photo in the show

**E:** Takes you to the **last** photo in the show

Photos are in alphabetical order so you can find the one you want by starting at the front or back and using the B or C arrows to navigate in the appropriate direction.
